## EV CHARGERS AND DISTRIBUTION

Valid offers a full line of EV charger and distribution kiosks for the rapidly growing Electric Vehicle industry. These kiosks are designed to the local utility requirements as well as all electrical codes and standards. Our EV charge kiosks offer protection against vandalism without compromising aesthetic appeal, providing an attractive housing enclosure for electrical equipment.

## CAM-LOCK EVENT POWER TIE IN AND TEMPORARY POWER

Our comprehensive line of cam-lock enclosures are designed for a wide variety of temporary power requirements. These enclosures feature user-friendly tie-in points and are ideal for applications that require occasional power, such as studios or events. They are also commonly used for emergency power feeds at construction sites, wastewater lift stations, or intersection lighting.

## POWER KIOSKS AND ENCLOSURES

To safeguard your power distribution services, Valid offers an expanding range of kiosks and enclosures. Our products prioritize ease of use while delivering a proven and robust solution, tested over many years of use. Whether illuminating a sports field, powering a pump station, electrifying street lighting, or supplying a home or commercial service, our kiosks and enclosures are fully integrated and certified.

## UTILITY METERING AND TERMINATIONS

Electrical utility companies have unique and evolving requirements for metered installation. Valid continuously liaisons with these companies to provide products that comply with the most up-to-date standards. These products, including kiosks, enclosures and pedestals are designed to conform with the latest metering and distribution installation standards, as well as Canadian Electrical Code and applicable CSA standards.

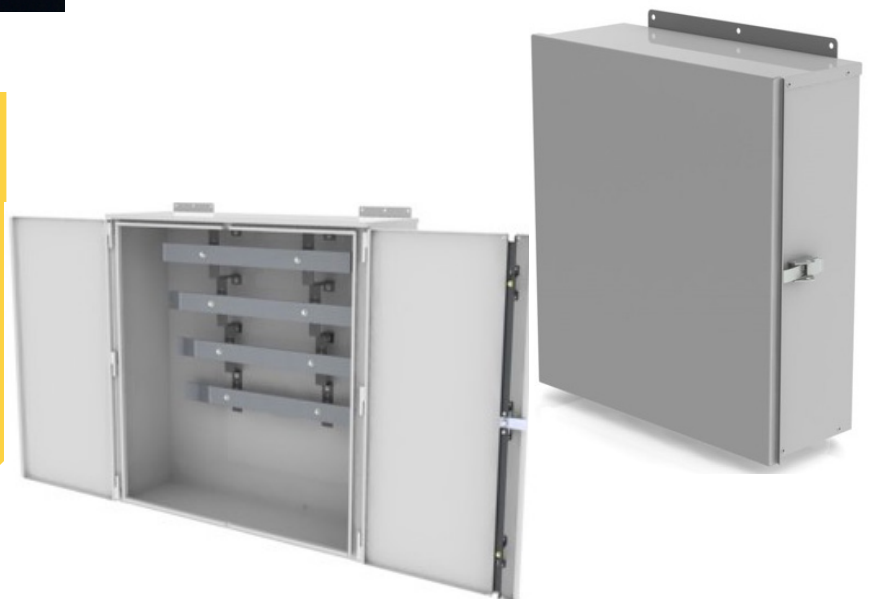

## DISTRIBUTION AND PEDESTALS

For powering RV parks, marinas, and parking lots, Valid offers a comprehensive range of distribution cabinets and pedestals. Our fully integrated packages ensure proper electrical coordination among all devices. For more extreme environments, we provide solutions in stainless steel or aluminum, while for applications in less demanding surroundings, we offer carbon steel options.

## COMMERCIAL ENCLOSURES AND SPLITTERS

Valid's large selection of high-quality enclosures and splitters provide robust protection against the elements.

All products are certified to CSA standards

## **INNOVATION**

Valid's in-house engineering team includes more than 50 mechanical, electrical, and electronics personnel. These talented individuals are the force behind Valid's innovative R&D solutions across multiple industries.

## **RESOURCES**

- Electrical & Mechanical Design
- Electronic & Software Development
- Light and Heavy Metal Fabrication
- CNC Punch
- CNC Press Brake
- CNC Gasket Machine
- Laser Cutter
- In-House Powder Coat Facility
- Environmental Chambers
- Welding

## **QUALITY**

Each product Valid manufactures goes through a rigorous Quality Assurance inspection. As an ISO 9001:2005-certified company, product quality remains our foremost priority.

## **SERVICE**

Valid ensures that an actual person answers your call to get you the help you need, when you need it. A team of dedicated service staff are available to provide support 24/7.
